

New Connection Agreement between KOSTT and ENTSO-E

The Chairman of the Energy Regulatory Authority Mr. Petrit Ahmeti seized this opportunity to welcome the announcement that the Regional Group Continental Europe voted on 20.04.2020 the new Connection Agreement between the "Transmission System Operator of Kosovo" (KOSTT) and the European Network of Transmission System Operators for Electricity (ENTSO-E).

KOSTT shall start operating as a Regulatory Area, within the Kosovo-Albania Regulatory Block.

This is an extremely important achievement not only for the Electricity System Operator of Kosovo but also for the establishment of a joint regulatory area between the two countries or the further steps of establishing market coupling between Albania and Kosovo, where the Operating System Operators are the main actors.

In this perspective, best wishes and thanks go mainly to the staff of KOSTT and TSO, as one of the main promoters of this process towards ENTSO-E, where KOSTT found the main support and a safe and reliable partner. Congratulations also to the colleagues of the Energy Regulatory Office of Kosovo (ZRRE) who, together with ERE, had a maximum commitment in this extremely important process in which TSO and KOSTT were supported for this achievement.

Once again, congratulating both Transmission System Operators for this important achievement of the Sector, and expressing my confidence in the continued achievement of other objectives in this field.
